

*Biosketch for Norman Mazer, M.D., Ph.D.*

Dr. Norman Mazer received his M.D. degree in 1978 from the Harvard-MIT Program in Health Sciences and Technology and a Ph.D in Physics from MIT the same year. He completed two years of Internal Medicine training at the Peter Bent Brigham Hospital (1978-80) and three years of additional post-doctoral research at MIT, Harvard Medical School, the Swiss Federal Institute of Technology, and University of Lund (Sweden) - investigating the biophysical aspects of cholesterol gallstone formation. After a 22-year career in the pharmaceutical industry and as adjunct professor of pharmaceutics at the University of Utah, Mazer joined Boston University Medical Center in 2005 as Associate Professor of Medicine and Director of the Androgen Clinical Research Unit. His current research and clinical interests include the physiological and therapeutic roles of sex hormones in men and women, the hormonal aspects of sexual dysfunctions, the quantitative modeling of endocrine systems, and the application of integrative medicine concepts in endocrinology. He has authored more than 80 original publications, review articles and book chapters, many involving the pharmacokinetics, metabolism and clinical application of transdermal testosterone systems for men and women, and recently joined the Editorial Boards of the Journal of Clinical Endocrinology and Metabolism and Current Opinion in Endocrinology and Diabetes. In 2006 Mazer received the North American Menopause Society/ Procter & Gamble Pharmaceuticals Androgen Research Award.
